

# SCS1311 Internet and Web Technologies

## Practical Sheet 01

---

### Task 1: Types of Websites

1. Write a short note on the differences between **static websites** and **dynamic websites**.
2. Open your web browser and explore examples of:
  - A static website (e.g., a personal portfolio site).
  - A dynamic website (e.g., an e-commerce platform).
3. Create a table comparing these two types of websites based on the following:
  - Content Updating
  - Technology Used
  - Interactivity

### Task 2: Web Authoring Languages

1. Create a new text file using a text editor (e.g., Notepad or Notepad++).
2. Write a simple **HTML document** that displays the following:
  - A heading with "Introduction to Web Technologies".
  - A paragraph describing "Web Authoring Languages".
  - A list of examples of web authoring languages (HTML, CSS, JavaScript, PHP).
3. Save the file as web\_languages.html and open it in your browser.

### Task 3: Client-Server Architecture

1. Write a short note explaining client-server architecture with an example.
2. Sketch a simple diagram (using pen/paper or any drawing tool) to depict the following:
  - Client (Browser)
  - Server (Web Server)
  - Database
