Application Laboratory Assignment

(3 questions in 3 pages)

(1) Do all of the following **using the command-line**

1. Go to the /root or /home directories.
2. Under your current directory, prepare the following directory hierarchy / structure using the command-line.

3. Now create a file named distance.edu in the CMT directory.
 4. Move the file distance.edu to the SriPalee directory.
 5. Then copy distance.edu into the eLC directory.
 6. Now go back to the UoC directory.
 7. While being in the UoC directory, change the permissions of user of the ADMTC directory to read only, and permissions of other of the eLC directory to write only using numbers.
 8. While being in the UoC directory, change the permissions of user and the permissions of other of the Admin directory to read & execute only using numbers.
 9. Go to the IHRA directory and change the permissions of user and the permissions of other of the Academic directory to read & execute only using letters.
 10. Without changing your current directory, change the permissions of the CMT directory to read & write using letters.
- (2) Using the vi or vim editor, create a website with details of an interesting place you have visited. (There should be atleast 1,400 words and 10 pages as well as images and links. You may download images from the web.)

(3) Using the vi or vim editor, write a 1,000 word essay about a school which you studied at.

Copy all your outputs for answers to questions (1), (2) and (3) into a directory with the naming convention <>Myname_IndexNo>>, compress it and upload it to the LMS.
