Example :

```html
<!DOCTYPE html>
<html>
<body>

<h2>HTML Forms</h2>

<form action="/action_page.php">
  <label for="fname">First name:</label><br>
  <input type="text" id="fname" name="fname" placeholder = " Enter first name"><br>
  <label for="lname">Last name:</label><br>
  <input type="text" id="lname" name="lname" placeholder = " Enter last name"><br><br>
  <input type="submit" value="Submit">
</form>

</body>
</html>
```

HTML Forms

First name:
[Enter first name]
Last name:
[Enter last name]

[Submit]

Form Element	HTML Tag	Purpose	Example
Text Input	<input type="text">	Allows users to enter a single line of text, such as their full name.	<input type="text" id="fullName" name="fullName" required placeholder="Enter your full name">
Password Input	<input type="password">	Allows users to input a password, with the text obscured (hidden).	<input type="password" id="password" name="password" required placeholder="Enter your password">

| Checkbox | `<input type="checkbox">` | Allows users to make a selection by ticking a box (e.g., agreeing to terms). | `<input type="checkbox" id="termsCheckbox" name="terms" required>` I agree to the terms and conditions |
| Submit Button | `<button type="submit">` | Submits the form data to the server for processing. | `<button type="submit">Submit</button>` |

Create the following html forms

Task 01 :

Registration Form

Name:
`Enter your name`

Email:
`Enter your email`

Age:
`Enter your age`

Address:
`Enter your address`

`Submit`

Task 02 :

Login Form
User Name :
`Enter your user name`

Password :
`Enter your password`

`LOGIN`

Task 03 (Home work) :

Imagine you're tasked with designing an event registration form for an upcoming tech conference. The form should collect the following information from the user

1. **Full Name (hint:Text Input Field)**
   The user should be able to provide his/her full name..

2. **Email Address (hint:Email Input Field)**
   The user should be able to provide his/her email address.

3. **Event Type (hint: Dropdown List):**
   The user selects what kind of event they are attending from a dropdown list. Options include:
   - Workshop
   - Conference
   - Seminar

4. **Number of Guests (hint:Select Box):**
   The user selects how many guests they're bringing. Options:
   - 0 guests
   - 1 guest
   - 2 guests
   - 3 guests

5. **Food Preferences (hint:Combo Box)**
   The available options for food preference include:
   - Chicken
   - Fish
   - Vegetarian

6. **Preferred Payment Method (hint: Radio Buttons)**
   The user should choose their preferred method of payment for the event registration. The options are:
   - Credit Card
   - PayPal
   - Bank Transfer

7. **Agree to Terms and Conditions (hint: Checkbox)**
   The user must check a box to agree to the event's terms and conditions before submitting the form.

   Expected Output:
